SAFE INFUSION FOR SAFER HEALTH CARE

INTERNATIONAL NURSING CONFERENCE- 2012

In many nursing practice settings, a great deal of the nurse's time and professional responsibility revolve around competent delivery of intravenous therapy. Nurses are typically the professionals who are accountable for maintaining, monitoring, and evaluating the effectiveness of intravenous therapy.

Nurses are also responsible for gaining intravenous access and initiating infusions. Therefore, it is vitally important that today's nurses understand the challenges of intravenous therapy and develop proficiency.

Apollo college of Nursing a unit of JCI accredited Apollo group of hospitals was started in the year 1997 and offering B.Sc, M.Sc, Post basic B.Sc, and PhD in nursing courses in addition to Post basic diploma in eight branches of specialities of nursing. The continuing nursing education cell of Apollo college of Nursing organizes every year an International Nursing conference in the month of December.

This is the 5th conference designed to empower the participants on infusion therapy, infusion devices, safe transfusion of blood & blood products, parenteral nutrition, administration challenges in neonatal & parenteral infusion & infusion safety in chemotherapeutic agents.

Eminent speakers from India and Overseas have given their consent to share their wisdom during this conference. We believe that this conference will help the participants in learning and refreshing infusion therapy and arouses curiosity, interest and sharpen their clinical skills to promote the quality of intravenous therapy in their practice

Highlights

- **INFUSION THERAPY** – An overview
